

ZEBRA

working hard since 1992 providing the latest in DPT services to environmental professionals.

...including air-Vacuum Excavation Systems

POTHOLE

Faster

Cleaner

Safer

ZEBRA can dig effectively in any kind of soil and the spoils stay dry for easy vacuuming and backfilling. Additionally, air won't harm the road base or the utilities you are exposing, and it is nonconductive. The ZEBRAVAC has an air-vacuum excavation system designed for your type of utility clearance work and all have water on board as a backup.
